A Prognostication for the Year of Our Lord God, 1677.

Wherein we have a Tide-Table, the time of the Eclipses for this Year, with divers observations for Physick, Husbandry, and Gardening; and also for the making of all sorts of Bonds, Bils, Acquittances, Wills, and Indentures:

With a Description of the High-ways and Fairs througout England.

CALCULATED

For the Meridian of *Kings-Lyn*, where the North-Pole is elevated 52 degrees, 43 Minuts above the Horizon, and may indifferently serve any other place within the Realm of England.

LONDON,

Printed by *A. Purslow*, for the Company of Stationers. 1677.

By the help of the following Tables, you may readily find the time of full Sea, or High-water at any of the Havens under-named, without any notable errour: Except the Moons latitude, Land-floods, contrary winds, &c. somewhat alter the time: The first sheweth the names of certain Havens, the point of the Compass whereunto the Moon coming, maketh High-water.

Of the Eclipses this year. 1677.

THere will be four Eclipses this year, two of the Sun, and as many of the Moon, of which only the first of the Moon will be in part visible to the inhabitants of England.

This Eclipse happeneth upon the 7 of *May*, it will begin at 55 *min.* after 1 in the morning, the middle will be at 25 *min.* after 8. and the end at 55 *min.* after 4. Two third parts of the Moons body will be darkned, and the end cannot be seen because the Sun is then risen.

The Second Eclipse will be of the Sun, on the 21 of *May*, about 10 in the Forenoon, and although the Sun at that time be above our Horizon, yet the Parellax and Latitude of the Moon deprive us of the sight hereof.

The third is of the Moon, on the 30 of *October*, about 10 in the Forenoon, and cannot be seen of us.

The fourth Eclipse is of the Sun on the 14*th.* of *November* about Midnight, and so not to be seen.

A description of the four Quarters of the year,

Spring begins March 9, 26 m. after 9 in the morn.
Summer begins June 10. 12 m. after midnight.
Autumn begins September 12. at 4 afternoon.
Winter begins December 11, neer 4 in the morn.

Rules concerning Husbandry.

WHen you would Plant or Graft, consider where the wind bloweth, if it be in the South it is very good for that purpose, but if it be North or East it is not good.

It is good to plant or graft generally the Moon encreasing in these signs, Taurus or Aquarius, in the beginning of the [illegible] or latter end of Harvest.

Plant

Plant trees for continuance, when the Moon is in Taurus Leo, or Aquarius.

Cut timber to have it found in December or January, in the wane of the Moon in Aquarius or Pisces.

Prune trees and pull off the moss in the moneth of Febr.

Plash hedges, and Lop trees for Fewel, that the heads may the sooner grow again, when the Moon is in Aries or Libra, and in her increase.

Set young Quicksets from September to March.

Remove young Trees in the last quarter of the Moon, when she is in Aries, Libra, Scorpio; and in these Months, September, November, February.

Set Vines in February, March or September, especially the Moon in Aries, Libra, Scorpio, in her increase.

Set Rose trees in the midst of February, the Moon increasing.

Cut or prune trees in March or April, the Moon in Taurus, Virgo or Capricorn.

Gather fruit, as Apples, Pears, and the like, at the full Moon the afternoon, the weather being fair and dry.

Cut down Hay presently after the full of the Moon.

Dung ground to prevent growing of weeds, Moon decreasing.

Sow Carret-seeds about the end of February, or the beginning of March, the Moon increasing. Also sow Onions, and Leeks in February or March, at the wane of the Moon.

Sow Cucumbers and Millions in February or March, or June, in a hot and fair day.

Sow Parsley, Fennel, and Annisseed, in February or March, at the full of the Moon.

Sow Margerum, Violets, Time, Rosemary, and Lavender, in February, March, or April, in the increase of the Moon.

Sow Gilliflowers and Wall-flowers in March or April, in the old of the Moon.

Sow Hyssop and Savory in March, when the Moon is old.

Sow double Marigolds in February or March, in the increase of the Moon.

Shear Sheep at the increase of the Moon.

The best time to Geld [illegible] Moon [illegible] Aries, Sagittarius or Capricorn.

Of Blood-letting, and some other Physical Observations.

IN youth let blood from the change to the first quarter, in middle-age, from the first quarter to the full. In elder years, from the full to the last quarter. In old age, from the last quarter to the change. But know, that under the age of 14. and above the age of 56. it is not good to bleed at all.

Again, in the Canicular or Dog-dayes, it is very hurtful to take any Physick at all, unless there be great need; and indeed necessity hath no law: Wherefore in such a case, the disease being desperate, the cure must be adventured.

Take a purgation when the Moon is in Trine, or Sextile aspect with Venus, decreasing in any of these three Signs, Cancer, Scorpio, or Pisces, and it will be sure to work the better, because when a moyst Planet, in a moyst Sign hath such an aspect, the humours in the body are then stirred up and down, and so the better purged out; wherefore in this case, it cannot be amiss to prepare humours by something that is laxative: and let this be done whilst the Moon is either in Gemini, Libra, or Aquarius.

Take a vomit that it may work thoroughly, when the Moon is in Aries, Taurus, or Capricorn: and know that the aspects of the Moon with Saturn, or Mars, or the Moon in Leo, ought to be eschewed in the taking of Medicines.

Finally, if necessity urge no haste, these observations are expedient: for it is a plain truth, that the change of weather upon differing aspects, doth greatly change and alter mens bodies.
